

KM Product Highlights

KM machines produce clear, crescent shaped ice. The unique shape is extremely versatile and extends from the splash-free serving of post mix soft drinks through to diverse applications such as fish transportation, display and even laser therapy.

This range includes a double-sided stainless steel evaporator, which requires fewer cycles to produce a full bin of ice, thereby reducing energy consumption.

All units are easily accessible for service via the front of unit. This reduces the time it takes to complete maintenance tasks

Ice machines are computer controlled so the ice making process is optimised under varying circumstances without the need for physical adjustments.

An easily cleanable air filter allows users to carry out a routine cleaning schedule themselves, extending the life expectancy of the ice maker, and cutting the frequency and cost of maintenance call-outs.
